Data Management Insight Awards 2021 Winners Report

@DataManagementInsight
Search: DataManagement Insight

www.datamanagementinsight.com
Congratulations to the winners of A-Team Group’s Data Management Insight Awards 2021.

Although we are still unable to hold our usual lively lunch to celebrate our winners, their achievements are no less significant for that, and we extend our congratulations to all those with best-in-class data management services and solutions.

The annual Data Management Insight Awards recognise both established solution providers and innovative newcomers, and seek to highlight data management solutions that have successfully improved firms’ abilities to manage, control, analyse and gain insight from ever-growing volumes of data across global capital markets.

Award categories ranged from best data lineage solution to best data quality analysis tool, best standards solution, best entity data solution, best cloud-based solution, and more.

Two editor’s recognition awards were also made. Adrian Pearce, Group Chief Data Officer at Credit Suisse, received the award for best data management practitioner; and Bill Hauserman, Senior Director, Head of Financial Crime Due Diligence – Americas at Moody’s Analytics, was named best data management vendor professional.

The awards were overseen by our independent advisory board, which helped shape the categories and review the nominations alongside A-Team Group’s editorial team. Jointly they considered the depth of involvement in capital markets, relevance of a solution or service to a selected award category, and the potential interest of a solution or service for data management practitioners.

Thank you to our Data Management Insight community for taking the time to vote for your preferred data management solution and service providers – your opinions are critical to the success of our awards.

Finally, our compliments to all our winners, who should be deservedly proud of their achievement in such a closely fought and highly competitive contest.

If you would like to be considered for future Data Management Insight awards visit [http://bit.ly/DMIAwards](http://bit.ly/DMIAwards) and enter your details to be notified when we open for nominations.

Andrew Delaney
President & Chief Content Officer

Let’s talk about the next wave in AI, Machine Learning & Managed Services

SmartStream’s fully integrated suite of solutions and platform services for middle- and back-office operations are more relevant than ever – proven to deliver uninterrupted services to critical processes in the most testing conditions. Their use has allowed our customers to gain greater control, reduce costs, mitigate risk and accurately comply with regulation.

With AI and machine learning growing in maturity, these technologies are now being embedded in all of our solutions and can be consumed faster than ever either as managed services or in the cloud.

Simply book a meeting to find out why over 70 of the world’s top 100 banks continue to rely on SmartStream.

info@smartstream-stp.com
smartstream-stp.com
Winner: Best Sell-Side Managed Services Platform

SmartStream has become a trusted partner that deliver automation and control the world’s leading capital markets, buy-side firms and corporations. The demands of the industry particularly at times of transformation has allowed us to grow, introducing new solutions and winning multiple industry accolades.

SmartStream’s solutions and services span the transaction lifecycle and incorporate the latest AI and machine learning technologies. These can be accessed in a variety of ways, for example, via APIs and micro-services, or deployed as managed services and cloud environments.

SmartStream has a wide range of solutions and services in the areas of:
- Cash & Liquidity Management
- Collateral Management
- Corporate Actions Processing
- Digital Payments and Investigations
- Fees and Expense Management
- Post Trade Processing
- Reconciliations and Exceptions Management
- Reference Data

About SmartStream Technologies

SmartStream is a recognised leader in financial transaction management solutions that enables firms to improve operational control, reduce costs, build new revenue streams, mitigate risk and comply accurately with regulations. By helping its customers through their transformative digital strategies, SmartStream provides a range of solutions for the transaction lifecycle with artificial intelligence and machine learning technologies embedded – which can also be deployed in the cloud or as managed services.

Winner: Best Sell-Side Data Management Platform

Alveo

Winner: Best Sell-Side Data Management Platform

Through our managed services, we ensure that clients can smoothly onboard, prepare and validate data for use in operations, trading, investment management, pricing, risk, reporting and machine learning. We service a global client base and our award-winning technology provides easy integration into business user workflows and a proven platform for advanced analytics. Through combining deep domain expertise with the latest open-source technologies, we help financial institutions ensure high-quality data, optimize market data cost and maximize productivity.

About Alveo

Alveo is the leader in market data integration and analytics solutions for financial services. Focused on optimizing data flows for business user self-service, we provide cloud-native data aggregation and data quality management that enables clients to easily access trusted data while maximizing their data ROI. Through our managed services, we ensure that clients can smoothly onboard, prepare and validate data for use in operations, trading, investment management, pricing, risk, reporting and machine learning.

Bureau van Dijk, a Moody’s Analytics Company, helps you make better decisions. Orbis, our renowned entity database, contains information on over 400 million companies across the globe.

**It’s a growing database**
Coverage has increased steadily year on year, the result of adding more entity types and ongoing proactive and expansive sourcing projects. Entities include banks, insurance companies, non-bank financial institutions, marine vessels, sole proprietorships and an increasing number of funds. We link entities and people, so you can understand a corporate group and highlight key owners, including beneficial owners.

**It offers flexible access**
Access Orbis via:
- the Orbis interface
- one of our catalysts that tailors Orbis for your use case
- a range of contemporary bulk data delivery options, including the new Moody’s DataHub.

**It’s a quality database**
Orbis has seen the integration of data from recent Moody’s acquisitions: Cortera, RDC and Acquire Media. More credit and risk events in Orbis, contribute to quicker and more comprehensive screening and onboarding. Aiding clients further, the data provided in Orbis now also includes environmental, social, governance (ESG) scores and credit risk scores which respond to changes in the economic environment. Our processes are robust, broad and end to end. We go further than just providing data - we treat, append and standardize it to make it richer, more powerful and easier to interrogate. Orbis combines data from hundreds of sources that we constantly monitor for quality. We then add and link complementary datasets so you benefit from a more rounded company view.

**About Bureau van Dijk – Orbis**
At Bureau van Dijk, we capture and treat entity information for better decision-making and increased efficiency. With information on over 400 million companies worldwide, Orbis is the resource for entity data. It includes comparable information, extensive corporate ownership details and comprehensive coverage, combining data from hundreds of sources. Our master data attributes, bespoke matching/de-duping and data enhancing services mean you can create links between disparate datasets across your organization and create your ‘golden record’ from data silos. Content that you can use for your master data projects includes firmographics, company size metrics, and corporate hierarchies. We offer a wide range of data integration options, and apps, so you can seamlessly refresh, maintain and enrich your in-house data systems.

www.bvdinfo.com
Capco’s Data practice works closely with leading global financial institutions and industry bodies such as the EDM Council to position data at the heart of business culture and implement data strategies that ensure compliance with today’s broad array of data-led regulations. The expertise and insights of our 800+ strong team of data practitioners enable financial services firms to take a leading role in a data-driven society by transforming how they engage with, manage, distribute and leverage data.

Our team collaborates with clients to implement governance, TOM and data supply chain solutions, with a focus on next generation innovation solutions involving data science, machine learning and graph-based data models. With financial institutions transitioning from reactive data quality management to a more proactive approach, we advocate measures to identify critical data quality issues closer to authoritative sources and achieve more effective root cause analysis.

We are passionate about advancing our vision of a new data paradigm in financial services, which includes the ethical sourcing, sharing, processing and commercialization of data, and the development of data ethics principles and a supporting framework. The team also champions ‘data for good’ events, which unite our top data talent in support of charities facing data-related challenges.

About Capco

Capco, a Wipro company, is a global technology and management consultancy specializing in driving digital transformation in the financial services industry. Capco operates at the intersection of business and technology by combining innovative thinking with industry knowledge to fast-track digital initiatives for banking and payments, capital markets, wealth and asset management, and the insurance sector. Capco’s cutting-edge ingenuity is brought to life through its Innovation Labs, and award-winning culture.

For more than 90 years, SIX has provided the financial data and services the industry needs: high-quality data, delivered at the right time, in the right way. From our core reference data on securities, prices, corporate events, tax and regulatory data, to our flagship indices and bespoke benchmarks, SIX offers added-value services that smoothly integrate with your workflows. We free your time and attention to spend on growing your business.

Today, fighting climate change is one of the most important goals on the global political agenda with social and governance factors also being hot topics. This has instigated a global shift in the financial sector towards sustainable investment strategies and the choice for future-oriented investors is expected to keep on growing. One of the major challenges surrounding ESG investments (ESG stands for Environment, Social, Governance) is sourcing reliable, consistent and comparable ESG data.

At SIX, we provide a wide range of sustainable services, including ESG Regulatory Data, alternatively sourced ESG Performance Data and ESG Indices. Whether you want to simplify your disclosure requirements to comply with the EU Action Plan on Sustainable Finance, enhance your investment process for sustainable investments with specialized alternatively sourced ESG data, provided through Artificial Intelligence (AI) and machine learning or you are looking for sustainable benchmarks, SIX is your reliable partner to cover your high quality ESG Data needs.

About SIX
SIX operates and develops infrastructure services for the Swiss and Spanish Stock Exchanges, for Securities Services, Banking Services and Financial Information with the aim of raising efficiency, quality and innovative capacity across the entire value chain of the Swiss and Spanish financial centers. The company is owned by its users (121 banks). With a workforce of some 3,500 employees and a presence in 20 countries, it generated operating income of CHF 1.38 billion and Group net profit of CHF 439.6 million in 2020.

www.six-group.com
The Derivatives Service Bureau is a global numbering agency for OTC derivatives serving the needs of market participants through the allocation of International Securities Identification Numbers (ISINs), the Classification of Financial Instruments (CFI) and Financial Instrument Short Name (FISN), all globally recognised and adopted ISO standards for identifying, classifying and describing financial instruments.

From Q3 2022, the DSB also expects to be providing Unique Product Identifiers (UPIs) for over-the-counter (OTC) derivatives to enable global regulatory authorities to aggregate data on OTC derivatives transactions to help assess systemic risk. This follows designation by the Financial Stability Board (FSB) in 2019 as the sole service provider for the future UPI system, performing the function of issuer of UPIs as well as operator of the UPI reference data library.

With an underlying technology platform that is built to support multiple taxonomies of definitions and descriptive data, as well as numbering in near-real-time, the DSB is motivated to bring greater transparency and integration within the OTC derivatives market, enabling institutional investors to standardise data and better control operational risk. Users can access the DSB through a web interface, by accessing data in daily update files or by direct integration to front-office systems for trading and order management.

The DSB is a legal subsidiary of the Association of National Numbering Agencies (ANNA). With widespread industry representation, expertise and collaboration at its core, the DSB’s history, pedigree and expertise are rooted in ANNA, with its broad experience and overview of handling both on and off-exchange ISINs for all asset classes. If you would like to use the Derivatives Service Bureau please visit the DSB website.

About The Derivatives Service Bureau (DSB)

The Derivatives Service Bureau is a global numbering agency for OTC derivatives serving the needs of market participants through the allocation of International Securities Identification Numbers (ISINs), the Classification of Financial Instruments (CFI) and Financial Instrument Short Name (FISN), all globally recognised and adopted ISO standards for identifying, classifying and describing financial instruments. The DSB works to provide industry led, standardised OTC data for an evolving market.

Editor’s Recognition Award for Best Data Management Practitioner

**Adrian Pearce**  
**Group CDO, Credit Suisse**

Dr Adrian Pearce is the Group Chief Data Officer (GCDO) and acts as a Senior Advisor to the Group Chief Operating Officer. As GCDO, Adrian is focused on the architecture, governance, security and underlying quality of data within the bank. Adrian has applied significant focus to the usage and analysis of Credit Suisse data to create business value for the organization. His advisory mandate focuses on the effectiveness of business processes and significant change programs globally across the Group.

Editor’s Recognition Award for Best Data Management Vendor Professional

**Bill Hauserman**  
**Senior Director, Head of the Financial Crime Due Diligence Practice - Americas, Moody’s Analytics**

As the Head of the Financial Crime Due Diligence Practice for the Americas, Bill is focused on integrating financial crime due diligence with the broader range of Moody’s Analytics’ risk products and solutions. After 12 years designing and deploying due diligence automation platforms, Bill joined Bureau van Dijk in 2015 to develop better techniques for leveraging commercial and open source databases for financial crime risk detection. When the company was acquired by Moody’s Analytics in 2017, Bill continued his efforts for enabling clients to spot risk quickly by better understanding who they’re doing business with and the risks they present. Bill is a regular contributor at leading financial crime and compliance forums.
Winner: Best Data Lineage Solution

Adenza

Adenza provides customers with end-to-end, trading, treasury, risk management and regulatory compliance platforms which can be delivered on-premise or on-cloud. Adenza enables financial institutions to consolidate and streamline their operations with front-to-back solutions integrated with data management and reporting, benefitting from a single source of truth across the business. With headquarters in London and New York, Adenza has more than 60,000 users across the world’s largest financial institutions spanning global and regional banks, broker dealers, insurers, asset managers, pension funds, hedge funds, central banks, stock exchanges and clearing houses, securities services providers and corporates.
