Data Management Insight Awards USA 2026

It gives me enormous pleasure to announce the winners of A-Team Group's Data Management Insight Awards – USA 2026; we congratulate them all.

Now in its sixth year, these annual awards are our way of acknowledging the leading providers of data management solutions, services and consultancy services to capital markets participants across North America. As well as established solution vendors, we are dedicated to including innovative newcomers to this dynamic space.

These awards recognise the cream of the industry in more than 40 categories of data management solutions and services, and include Best Data Solution for Regulatory Compliance, Best Standards Solution for Data Management and Best Buy-Side Data Management Platform.

This year the prestigious A-Team Group Editor's Recognition Award for Data Management Industry Professional of the Year was presented to Brian Buzzelli, Director, AI, Data and Digital Transformation at Meradia/F2 Strategy.

Also, allow me to take this opportunity to thank all the vendors that entered A-Team Group's Data Management Insight Awards – USA 2026 and to our Data Management Insight community that voted for its preferred solutions. Permit us, also, to extend our thanks to our independent, expert advisory board, which worked in collaboration with our editorial team to select this year's winners.

Each year, the quality of the products and work highlighted in these awards breaks new grounds of excellence and this year was no different. The participating individuals and companies should feel very proud of their achievements, especially amid some very tough competition. Our compliments go out to you.

If you would like your company to be considered for future Data Management Insight Awards in Europe or the USA **click here**, where you can either enter your details to be notified when we open for nominations, or submit your entry if we are already open for nominations.

Andrew Delaney

WINNER: BEST INVESTMENT OPERATIONS & DATA PLATFORM

FINBOURNE Technology

FINBOURNE Technology provides the data foundation for asset managers, asset owners and asset servicers. Our enterprise data automation, investment management and fund servicing solutions run alongside existing systems or as the platform beneath them. A single transaction record with dual time series leaves no copies to reconcile and gives complete look-through across entities, fund structures and managers. Everything is exposed as governed, API-first services, so teams and AI agents work from the same trusted data.
